

HOW TO LOAD THE TARGET PROFILE FOR MechWarrior 5 ...

First, if not done already, install T.A.R.G.E.T, then reboot your computer.

Once done :

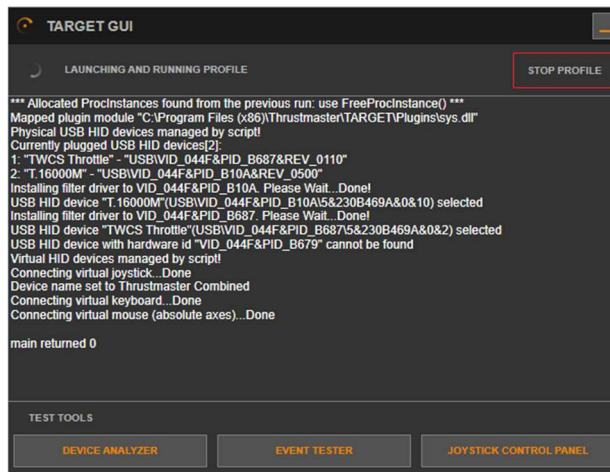

1. Plug your T.16000M FCS Duo to your computer.
2. Launch « TARGET GUI » (desktop icon, start menu or go to : "C:\Program Files (x86)\Thrustmaster\TARGET\x64\TARGETGUI.exe")
3. Click on the « Run configuration » button located in the top right corner of the interface.

4. Browse to the profile you want to load, in our case, « [Mechwarrior5.fcf](#) » and double-click it, it will then run the profile.

Note : running a profile for the first time can take some time.

5. Once you see this, you can launch « Elite Dangerous » software, **but do not stop the profile or exit T.A.R.G.E.T.**

Note : Once you stop playing and after exiting « Elite Dangerous », you can click on the « stop profile » button and exit T.A.R.G.E.T.

Good luck pilot !
