

HOW TO LOAD THE TARGET PROFILE FOR REDOUT ...

First, if not done already, install T.A.R.G.E.T, then reboot your computer.

Once done :

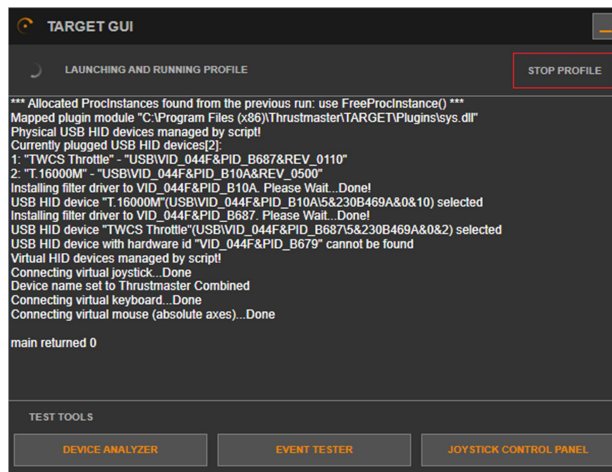

1. Launch « TARGET GUI » (desktop icon, start menu or go to : "C:\Program Files (x86)\Thrustmaster\TARGET\x64\TARGETGUI.exe")
2. Clic on the « Run configuration » button located in the top right corner of the interface.

3. Browse to the profile you want to load, in our case, « [redout t16000m.fcf](#) » and double-click it, it will then run the profile.

Note : running a profile for the first time can take some time.

4. Once you see this, you can launch « Redout » software, **but do not stop the profile or exit T.A.R.G.E.T.**

Note : Once you stop playing and after exiting « REDOUT », you can click on the « stop profile » button and exit T.A.R.G.E.T.

You are all set to beat the clock. Good luck pilot !
