

Thrustmaster T500 RS Racing Wheel
“GTR™ Evolution - PC”
- Example: How to modify an existing profile -

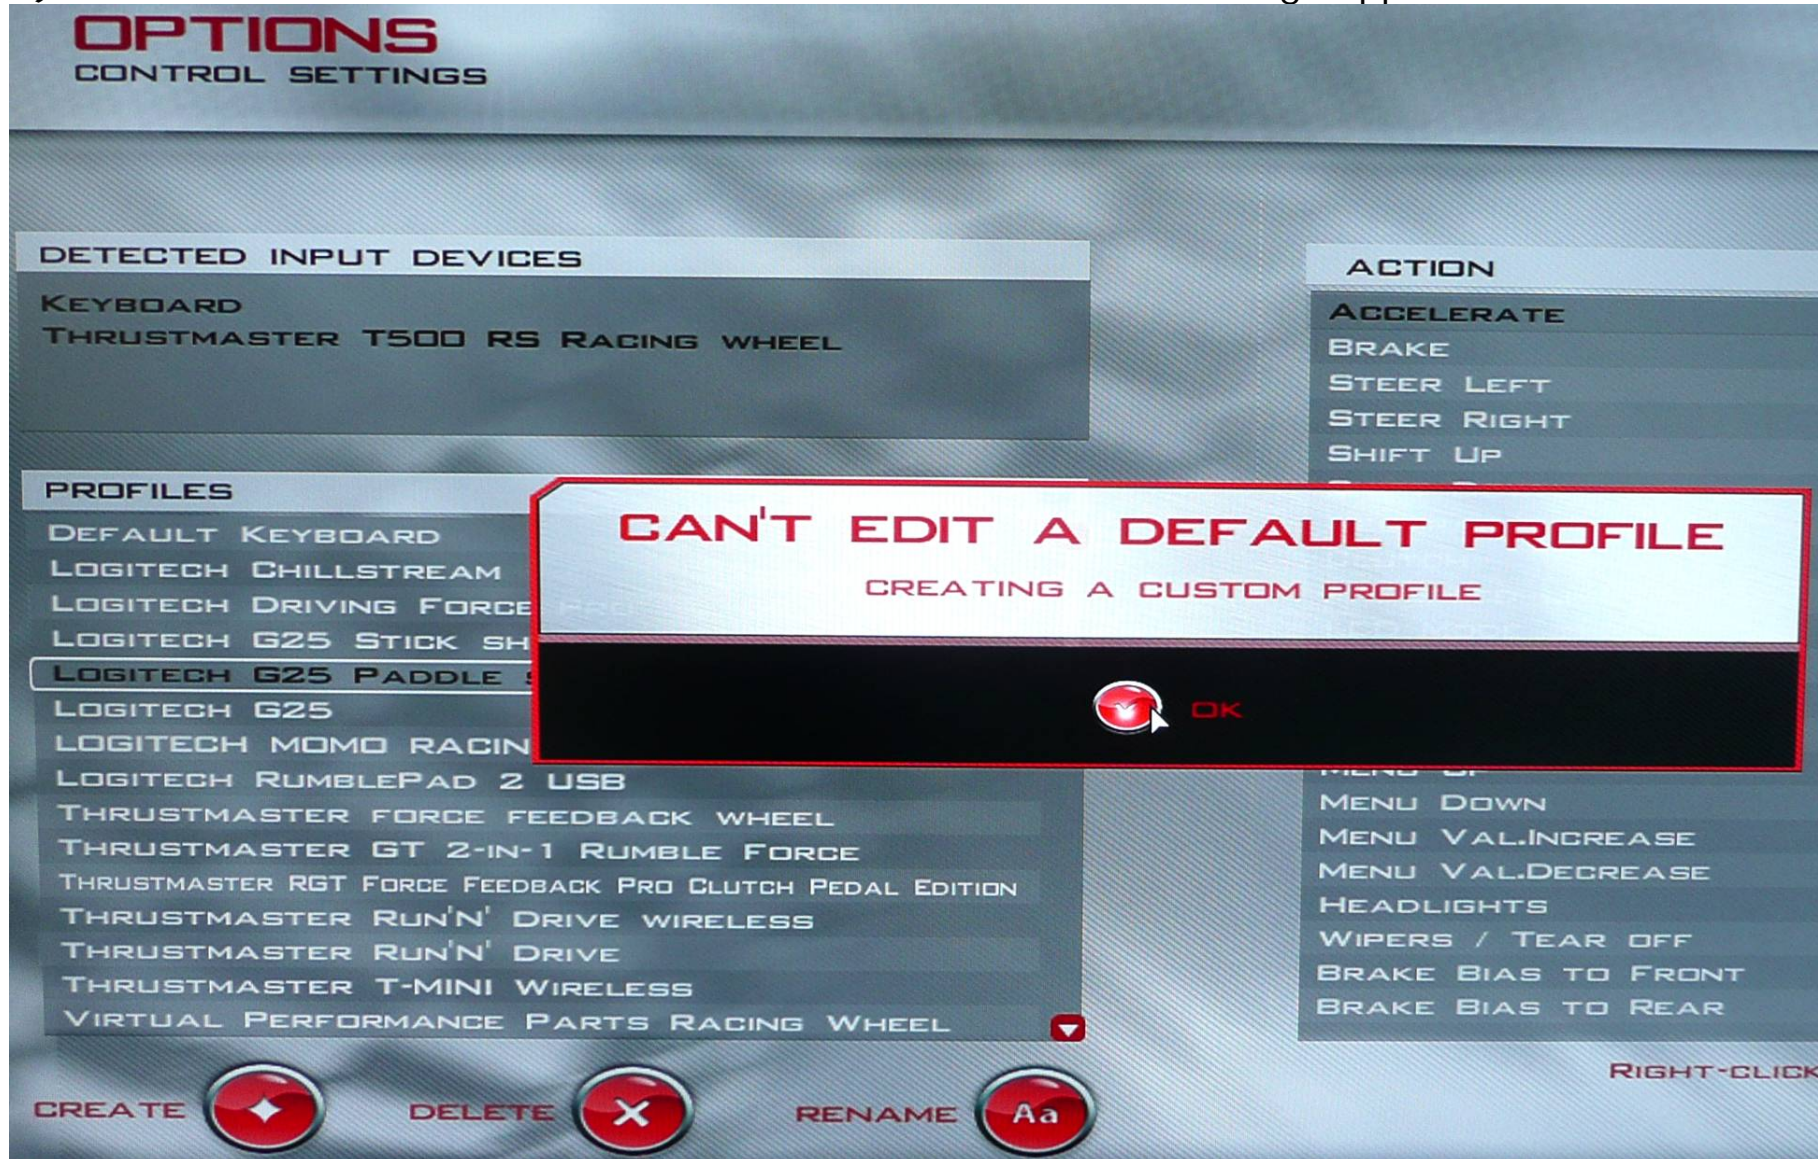

In the Control Panel, do not change the default Settings:

- Rotation Angle = 900°
- Pedals = Separate

- Overall Strength of all forces = 60%
- Constant = 100%
- Periodic = 100%
- Spring = 100%
- Damper = 100%
- Auto-Center Settings = by the game

- 1) **Launch** the Game
- 2) Access to **"OPTIONS/CONTROL SETTINGS"**
- 3) Click on **"SHOWING ONLY DETECTED"** then on **"LOGITECH 25 PADDLE SHIFT"**
- 4) Click on **"ACCECLERATE"** (in "ACTION" pane)
- 5) Click on **"OK"** when **"CAN'T EDIT A DEFAULT PROFILE"** message appears

6) Scroll down & select **"LOGITECH G25 PADDLE SHIFT CUSTOM"**

7) Click on **"RENAME"** and enter new name **"T500 RS"**

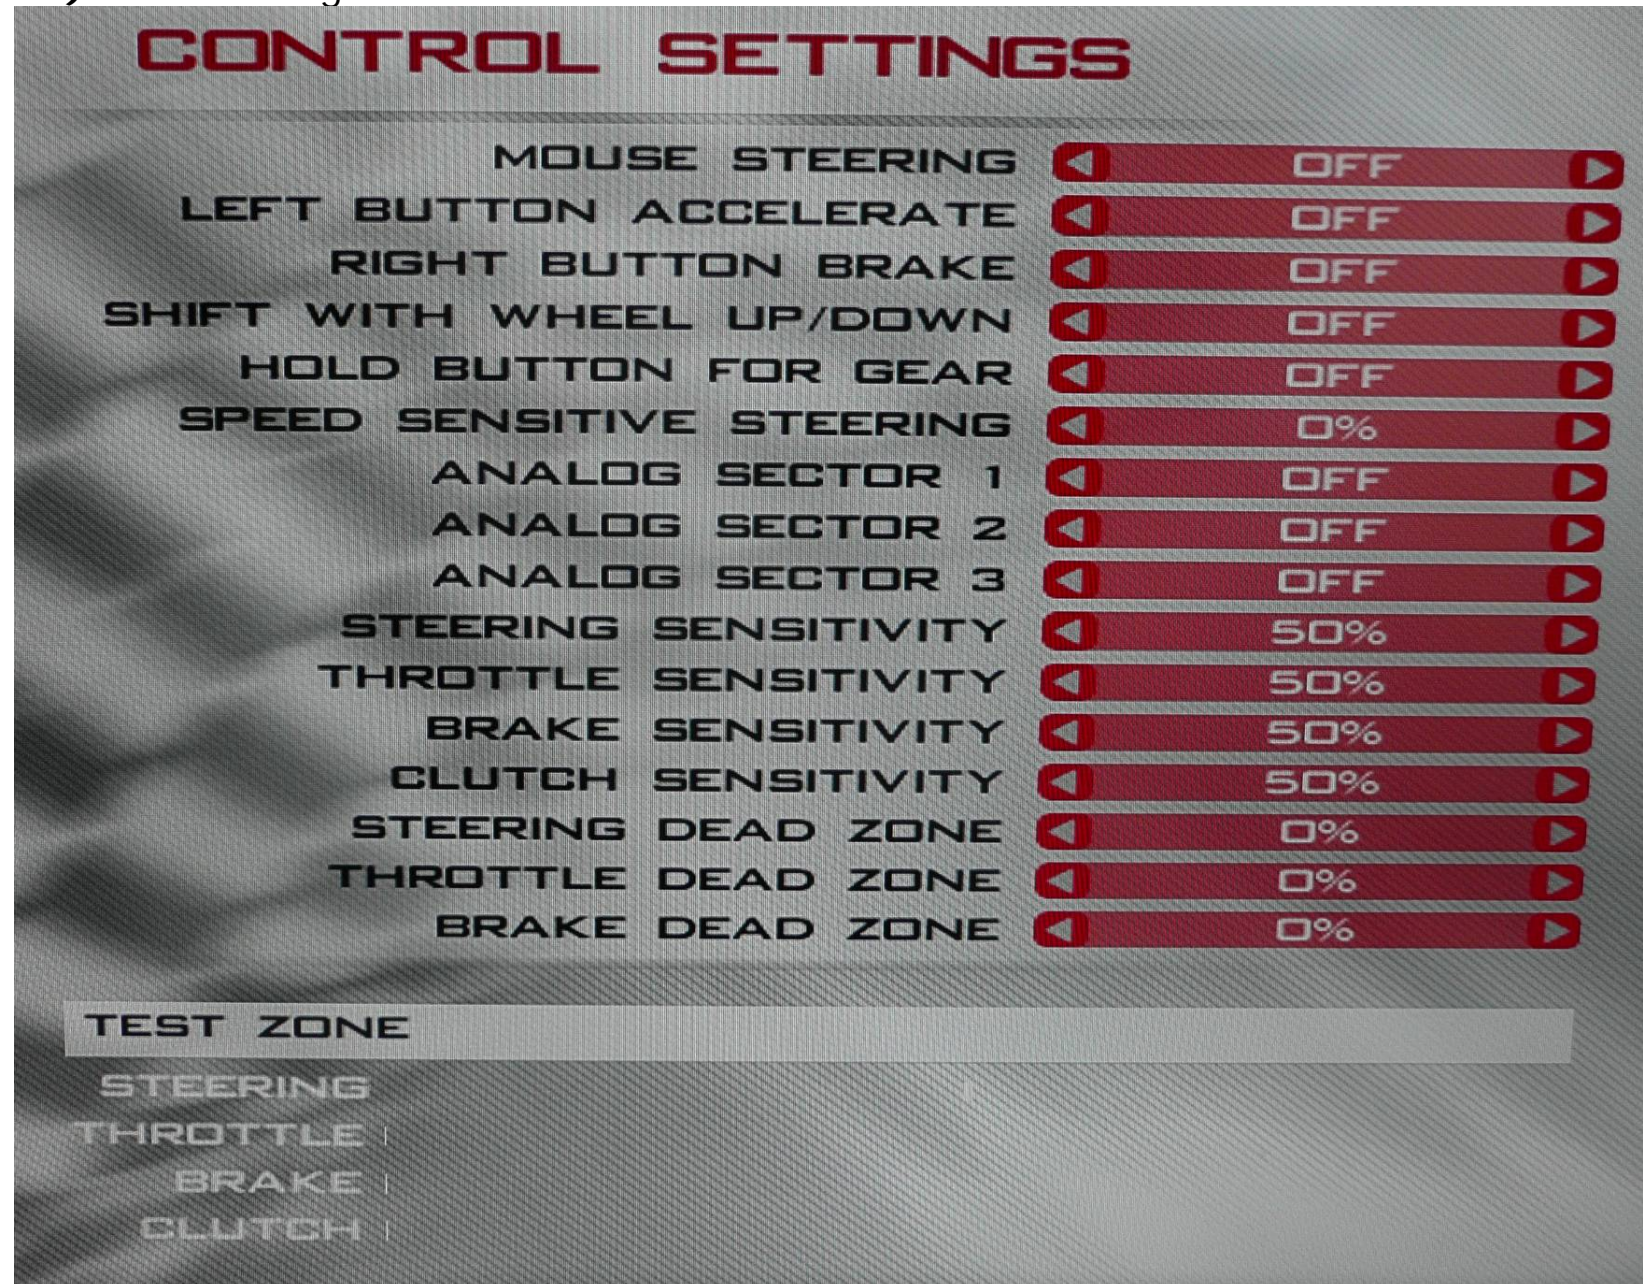

8) Now configure correctly all axes & buttons (Accelerate, Brake, Steer Left, Steer Right, etc...)
