# T818

TELEMETRY FUNCTIONS

Updating the firmware

In order to take advantage of the telemetry functions, it is imperative that you install an **official Thrustmaster wheel** on the T818 base and that you update your base's firmware with the **latest firmware version**.
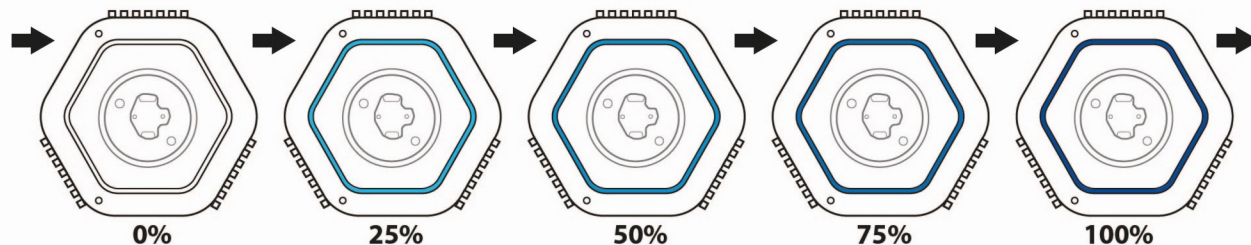

To carry out the update, go to
https://support.thrustmaster.com/product/t818

Select **Firmware** and follow the instructions, including the downloading and installation procedure.
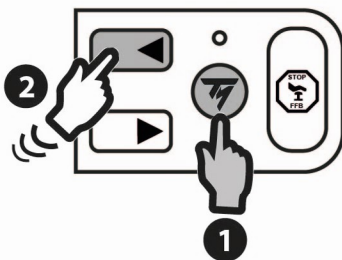

Adjusting the LED brightness

Press and hold button ⏚, then press button ▶.

Each press of button ▶ increases the brightness by 25%.

When you reach 100%, the next press switches the brightness to 0% and the cycle starts again:
0% - 25% - 50% - 75% - 100% - 0% - 25%...

| 0% | 25% | 50% | 75% | 100% |

Choosing the telemetry pattern

Press and hold button ⏚, then press button ◀.

Each press of button ◀ moves on to the next telemetry pattern.

Pattern 0*

Pattern 1

RPM — FLAG — PIT

Pattern 2

RPM — FLAG — PIT

Pattern 3

RPM — FLAG — PIT

*Default pattern. The hexagon of RGB LEDs displays the color selected in the Control Panel, without taking telemetry data into account.
